WEATHER SYNOPSIS BY REGION

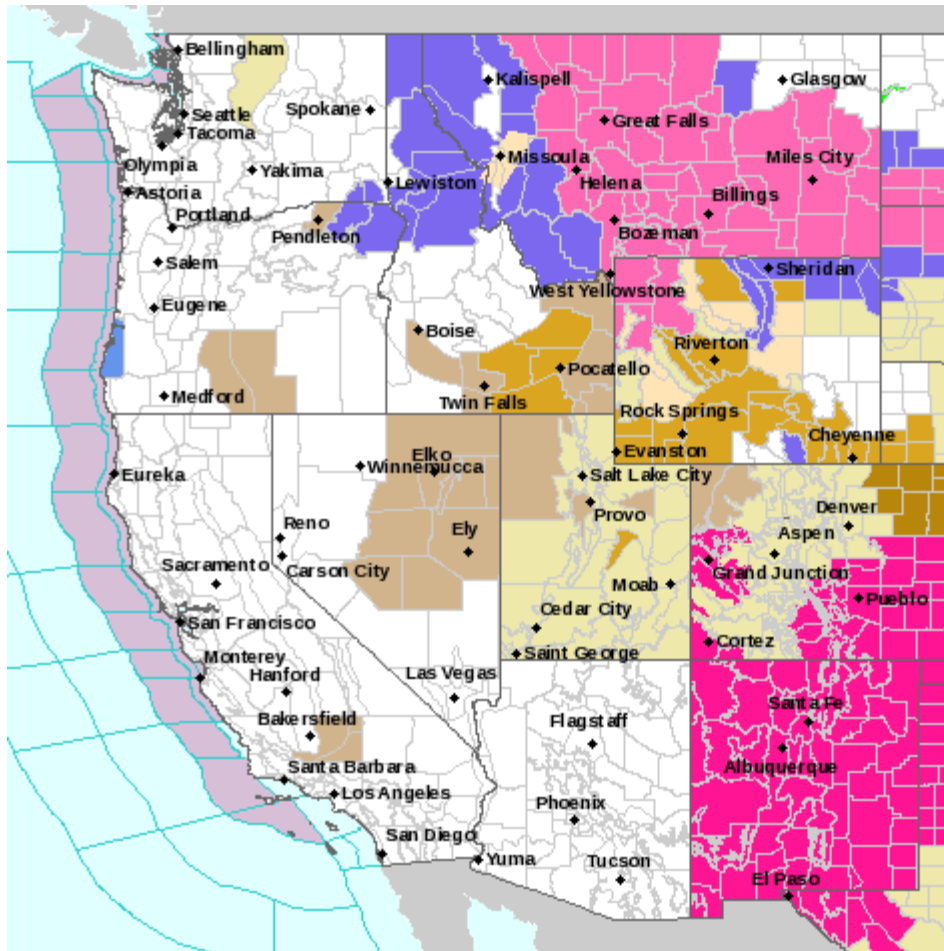

NORTHERN CALIFORNIA

As we start the month of April, warm and dry weather will persist through mid week before a wet, spring storm impacts the region for the end of the week into next weekend with rain and high elevation snow.

SOUTHERN CALIFORNIA

A low pressure trough off the coast will drift inland through Monday, deepening the marine layer, and spreading clouds and cooling well inland across the valleys and onto the lower coastal slopes. For Tuesday through Friday...weak high pressure aloft will bring warmer weather as the marine layer shrinks back toward the coast.
